**Dr. SCHNEIDER Felicitas, Thünen Institute of Market Analysis
Germany**

Felicitas Schneider holds a diploma degree in Civil engineering and water management. Since 2001, she specialised her research on the topic of food loss and waste prevention. She was involved in the development of national strategies towards food waste prevention programs, discussions related to the definition of food waste, designing applied methodology for measurement of food waste and various implementation projects along the food supply chain from primary production to households.

From 2001 to 2016, Dr. Schneider worked at the Institute of Waste Management at BOKU University in waste management research and teaching. In 2017, she finished her doctoral thesis ("Generation and Prevention of Food Waste in industrialised countries") at BOKU University of Natural Resources and Life Sciences, Vienna.

After 16 years in waste management, she has been working at the German Federal Research Institute for Rural Areas, Forestry and Fisheries, Thünen Institute of Market Analysis since June 2017. She is coordinator of the Collaboration Initiative Food Losses and Food Wastes launched at the Meeting of Agricultural Chief Scientists (MACS-G20), manages the "Global Platform for FLW experts and projects" and organises annual regional FLW workshops.
