

Massalin Nakphaichit, PhD
Department of Biotechnology, Faculty of Agro-Industry
Kasetsart University, Thailand
Email: fagimln@ku.ac.th

Massalin Nakphaichit is an Associate Professor in the Research Unit of Probiotics and Prebiotics for Health within the Department of Biotechnology, Faculty of Agro-Industry at Kasetsart University, Thailand. Her research group is involved in studying the effects of probiotics on health, identifying biomarkers, producing prebiotics from agricultural waste, and encapsulating probiotics. She serves as the Thailand representative on the International Executive Board Committee of the Asian Federation of Societies for Lactic Acid Bacteria (AFSLAB). Her interests lie in studying the impact of functional foods, including probiotics, prebiotics, and synbiotics, on human and chicken gut microbiota. She conducts academic research through collaborations with students and researchers from various universities and industries.
