

NARO

NARO 2nd International Symposium on Food and Health

Online

# Global Food Security and Human Health

~Toward Transforming the Food System with Advanced Technology~

NARO is holding the second online international symposium focusing on “Food and Health” . We will share research results and initiatives by research institutes and private companies around the world that continue to pursue the realization of “food security and health, ” and aim to strengthen international collaboration in order to accelerate every activity from R&D to social implementation, and business development.
