

Dr. KOBORI Toshiro
Leader of Health and Sensory Function Group, NARO, Japan

Profile

Dr. KOBORI Toshiro is Leader of Health and Sensory Function Group in Division of Food Function Research at Institute of Food Research, NARO. He received his Ph.D. in Biostudies from Kyoto University in 2007. He has been Associate Professor in Institute of Life and Environmental Sciences at University of Tsukuba since 2017. His research focuses on the development of novel biochemical technologies contributing to evaluation of food quality and human health. Currently, he is interested in identifying food ingredients that mitigate the effects of advanced glycation end products on human health.
