

**Dr. KASHIWA Takeshi, JIRCAS
Japan**

Profile

Dr. KASHIWA Takeshi is a Senior Researcher in Japan International Research Center for Agricultural Sciences (JIRCAS). He received his Ph.D. from Tokyo University of Agriculture and Technology in 2015. He had joined RIKEN Center for Sustainable Resource Science in 2015 as a postdoc. From 2017, he is a member of JIRCAS to solve problems with plant pathogens in agricultural fields. Based on genomics approaches to plant pathogenic fungus, he tried to unveil molecular mechanisms of plant-pathogen interactions. He is also interested in an application of new technologies and tools derived from his research in agricultural field survey. He had received a Young Scientist Award of World Soybean Research Conference (WSRC) in 2023.
