

**Dr. YANAGISAWA Takashi,
NARO, Japan**

Profile

Dr. YANANAGISAWA Takashi is a Manager of Division of Advanced Field Crops Breeding Research, Institute of Crop Science, NARO and currently involved in management of soybean, wheat and barley breeding research projects. He received his Ph.D. in soybean breeding from The University of Tokyo in 1994. He had joined wheat and barley breeding Program in Japan since 1994 and has been involved more than 20 cultivars. His research interest is focus on the development of new useful breeding varieties with improved agronomic traits (high yield, disease resistance) and superior quality characteristics for food quality.
